

CONFIGURATIONS COMPOSITITY

SIZE AND MINIMUM DIMENSIONS OF THE OPENING ON THE CEILING

If the opening already exists: based on the height between the floors (H), select from the possible configurations of the staircase the one compatible with the existing opening according to the diagram below.

If the opening is still to be made: based on the height between the floors (H), make the compatible opening with the configuration of the chosen staircase (straight, with one turn, with two turns) according to the scheme below.

HEIGHT BETWEEN FLOORS (H)	DIMENSIONS OF THE OPENING ON THE CEILING (with floor slab thickness of 30 cm)	
Min. 240 cm* Max. 260 cm	The opening must have at least the dimensions of the staircase.	
Min. 260 cm Max. 280 cm	The opening must have at least the dimensions of the staircase minus 1 step at the bottom.	
Min. 280 cm Max. 305 cm	The opening must have at least the dimensions of the staircase minus 2 steps at the bottom.	
Min. 305 cm Max. 325 cm	The opening must have at least the dimensions of the staircase minus 3 steps at the bottom.	
More than 325 cm	The opening must have at least the dimensions of the staircase minus 4 steps at the bottom.	

* Less than 240 cm: the opening must have at least the dimensions of the staircase plus a step at the bottom of the staircase.

CEILING OPENING WIDTH: staircase width + 5 cm

POSSIBLE CONFIGURATIONS OF THE STAIRCASE

Through the following configurations it is possible to determine the direction of ascent, the entrance and exit of the staircase based on the available widths and the number of steps.

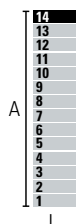

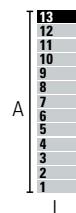

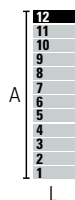

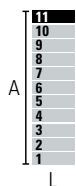

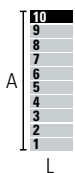

The measurements indicate the length of the staircase on the ground (A, L, C). The length of each ramp varies as the chosen tread going (run) changes (useful depth of the steps).

LEGEND:

- Steps with adjustable going (run)
- Top step fixed one rise below finished upper floor

STRAIGHT
